

Zinc Stearate V

Description

Zinc Stearate V is a dense, relatively non-dusting, uniform grade of Zinc Stearate. It is specifically manufactured and recommended for use in wood paints, rubber and elastomers.

Application

Zinc Stearate V is used in wood paints, as it does not cause either foams or breaking of veil, considerably improving the transparency as well capacity to be sanded.

Zinc Stearate is also used in rubber and elastomers as anti-adhesive for sheets and semi finished goods.

Typical data

Appearance	very fine white powder
Moisture	≤ 1 %
Sieve residue at 325 mesh	≤ 1 %
Acid number	≤ 3 mg KOH/g
Melting point	120 °C - 124 °C

Packaging

packaging unit

25 kg paper bags
500kg palett

Storage

Store at low relative humidity in closed bags. Do not store pallets on top of each other. This could compress the material and destroy application properties. Storage time after shipment should not be longer than one year.
